Athmer - securely sealed.

ATHMER

The latest technology at the highest level

Athmer has been involved in the production of automatic door seals for more than 60 years. The company's successful combination of experience, expertise and quality enables the continuous development and improvement of its product range. Offering the widest range on the market, Athmer has the right product for practically every type of application. In addition to automatic door seals for acoustic, smoke and fire protection doors, the range also includes seals such as for radiation protection doors and for doors with extremely large gaps of up to 50 mm at the bottom. Within the industry, the Athmer trademarks **Kältefeind®** and **Schall-Ex®** have become synonymous with automatic door seals.

Athmer's automatic door seals support the principles of **sustainable and energy-efficient building**. They reduce CO₂ emissions and make a real contribution to the eco-balance of a building. They also comply with the recommendations regarding barrier-free building and ensure that people who are elderly or have physical disabilities have convenient and safe access to buildings and rooms.

Athmer Finger Protection has been preventing fingers from becoming trapped between doors and frames for more than 30 years. Athmer offers a wide variety of possible solutions to ensure that automatic doors and doors in kindergartens can be used safely.

Athmer finger protection systems are also suitable for use with fire doors and smoke control doors.

We focus on sustainability

Calculate the ecological return for your building with the CO₂ climate calculator from Athmer

- Enter the parameters for your building and room, such as location, energy source, and sealing height of the doors
- Assess the results and see for yourself the energy-efficiency of Athmer door seals

Environmental Product Declaration (EPD) available for automatic door seals

Athmer supports sustainable construction and the ecological evaluation of buildings

- Internationally recognised and verifiable eco-balance
- Security of investment for building developers
- Compliance with the European standard EN 14025

Endurance test passed with flying colours

Athmer sets new standards: 1,000,000 test cycles!

- Verified durability that far surpasses the standard of the "Ü" sign of compliance
- A long-term, safe investment
- Resource conservation ensures sustainability

Athmer Technical Centre – The latest technology for concentrated development expertise

Athmer Technical Centre – The latest technology for concentrated development expertise

Athmer supports its customers in the different stages of product development

- Concurrent engineering: from the idea to the market-ready product
- State-of-the-art acoustic, air, wind, and water testing facilities

AUTOMATIC DOOR SEALS for timber doors

Barrier-free, sound insulation, smoke control, fire protection, tight seal and draught-free

When a door is installed, there is a gap between the door and the frame. This allows the door to be opened and closed. Necessary though this gap may be, it also offers a way for noise, smoke and dirt to cross the threshold. The door therefore needs to be sealed on all sides, since sound waves, like air, pass through every gap. An automatic floor seal closes the gap between the door and the floor and so seals the door against smoke, light, noise and dirt.

- Sound reduction up to 52 dB
- For door seals for acoustic, smoke and fire protection doors, tested by renowned test institutes
- 1,000,000 test cycles
- Barrier-free access
- For a variety of groove widths
- For single and double-wing doors
- Single or double actuation
- For internal and external doors
- Travel: up to 50 mm
- Complete sealing system for sliding doors
- Accessories: Flush bolt, floor strike recess, press plates

Doppeldicht® M-12/35

The slimline acoustic door seal

- Double actuation for individual floor level adjustment
- Single actuation optional
- Hinge-side actuator button, stepless fine adjustment
- of deeper grooves up to 40 mm possible
- Extra depth of groove is covered with stainless steel mounting bracket
- Slight subsequent reduction of door height

Optional: Special mounting bracket

- For use with multipoint locks
- Stile dimension: 20 mm
- Galvanised steel, art. no. 1589

Art. no. 5102

Schall-Ex® Inut

In direct contact with the door groove

- Lateral seal inside the groove
- Compensates for tolerances in the groove
- Hinge-side actuator for fine adjustment
- Also for double-wing doors

For use with acoustic doors

- High sound insulation capacity of 49 dB at a sealing height of 7 mm

For use with fire and smoke doors

- A single model to suit all applications
- Silicone profile for a flexible fit in the groove and to the floor

Schall-Ex® L-15

A classic

The Schall-Ex® L-15 family also impresses with its "inner values" since each seal, depending on its length, has up to three spring mechanisms that actuate in parallel. In addition, it ensures automatic level compensation and is ideal for offsetting any unevenness in the floor.

The new generation of this classic is not only technically mature but also has all the necessary certificates and test reports.

- High sound insulation capacity of up to 52 dB
- As DUO version, with double actuation **(from page 25)**
- Increased stability of form in the door rebate area
- Optimal corner connection
- Easy handling with shortened seal length
- With optional flush bolt set-up
- For single and double-wing door systems
- Faster installation due to sliding actuator without a press plate
- Sealing profile made of self-extinguishing silicone for acoustic, smoke and fire protection
- Perfect seal in combination with Athmer thresholds **(page 89)**
- Meets requirements for barrier-free construction
- Automatic door seals supplied with the "Ü" sign of compliance

Smoke and fire doors

Acoustic doors

Barrier-free

"Ü" sign of compliance

Schall-Ex® L-15/30 WS

- Unrivalled sound reduction values:
52 dB with 7 mm sealing height
- For sealing heights up to 20 mm
- Sturdy inner mechanical parts with
parallel actuation and optimum
floor level adjustment
- Clip-on sliding actuator for safe start-up
- Seal adjustment without tools
- Quicker installation, since no
need for press plate installation

Certificate:
"DIN approved -
Barrier-free"

R. NO. P11855/07

Fixing

1792

Door seal prepared for
flush bolt TK-15/BXL

Options

Flush bolt set-up

- For Ø 8 mm flush bolt
- Secure guidance for flush bolt
- No extra milling required for the flush bolt plate in the base of the groove
- Door seal prepared for flush bolt assembly
- State dimension X on the order
- Supply package includes bolt guide plate

Note: Minimum length if flush bolt hole incorporated = distance from drilled hole (X) + 272 mm

Flush bolts

- Flush bolts in two different lengths for locking and rebate flush bolt locks

Bolt guide plate for TS-8...				5135

Floor strike recess BS-8

- For Ø 8 mm flush bolt
- Best possible width and locking position for steel, timber and tubular frame doors
- Continuously adjustable range ± 2 mm in opening and closing direction
- Art. no. 128

Technical data

Material	Stainless steel floor plate and aluminium recess
Installation	Fix to floor using 2 countersunk screws Ø 4.5 mm (not supplied).
Recess required in floor	30 x 40, depth > 26 (mm)

Schall-Ex® L-15/30 OS

- Can be screw-fixed to lower door surface
- Unrivalled sound reduction values:
52 dB with 7 mm sealing height
- For sealing heights up to 20 mm
- Increased stability of form in the door rebate area
- Optimal corner connection
- Easy handling with shortened seal length
- Sturdy inner mechanical parts with parallel actuation and optimum floor level adjustment
- Clip-on sliding actuator for safe start-up
- Seal adjustment without tools
- Quicker installation, since no need for press plate installation

Product family

Schall-Ex® Ultra

- For all applications:
 - Acoustic, smoke and fire doors
- High sound absorption capacity: 51 dB
- Actuation on the opening face with automatic height and level adjustment
- Lock-side actuation,
 - Minimal pressure required for actuation
- Self-adjusting with overload protection
- Supply package includes accessories
- Optionally with single actuation, e.g. for the passive wing
- Sealing profile made of self-extinguishing silicone for acoustic, smoke and fire protection
- Superior seal in combination with Athmer thresholds
- Automatic door seals supplied with the "Ü" sign of compliance

- Anodised housing made of aluminium for long-term resistance to climatic conditions
- Stainless steel springs and rustproof inner mechanical parts
- Silicone profile prevents freezing in position and ensures a flexible seal with the floor even in icy conditions
- Schall-Ex® Ultra is the optimal choice for damp and wet room doors
- Corrosion-tested in accordance with EN 1670
- Highest corrosion class 5 = 480 hours of salt spray testing
- Double durability testing under wet-room conditions
- Full functionality after 500,000 cycles

Barrier-free

- Meets requirements for barrier-free construction

Certificate:
"DIN approved -
Barrier-free"

Multi-chamber seal

- The chambers in the seal help to provide thermal separation and break up sound waves
- Predetermined bending point for improved inner sealing
- Practically noiseless operation thanks to integrated cushioning in the silicone seal

Floor level adjustment

- Floor level adjustment with concave and convex floors

Automatic level compensation

- With integrated overload protection as standard:
Constant, even, and therefore optimal floor contact pressure
- Saves time, since no fine adjustment necessary
- Improved operational reliability since the system self-adjusts if conditions change

Schall-Ex® Ultra WS

- Actuation on the hinge side with automatic height and level adjustment
- Lock-side actuation, Minimal pressure required for actuation
- Self-adjusting with overload protection

- Tested in accordance with EN 1670

Schall-Ex® Ultra OS

- Actuation on the hinge side with automatic height and level adjustment
- Lock-side actuation, Minimal pressure required for actuation
- Self-adjusting with overload protection

- Tested in accordance with EN 1670

Door seal prepared for flush bolt TK-20/B-SU

Options

Flush bolt set-up

- For Ø 10 mm standard flush bolt
- Optional:**
 - Seal prepared for flush bolt assembly
- for smoke and fire protection doors with standard flush bolt
- Available for all backsets
- State dimension X on the order
- Floor strike recess BS-10 can be used

Note:

Minimum length if flush bolt hole incorporated = distance from drilled hole (X) + 217 mm

**Stainless steel
floor strike recess****BS-10**

- Best possible width and locking position for steel, timber and tubular frame doors
- Continuously adjustable range ± 2 mm in opening and closing direction
- With its elongated slot, the retainer makes positioning easy and compensates for any lateral tolerances
- Optimal for automatic locks: Long mounting surface and wide chamfer
- Easy installation with only two diagonally-arranged fixing screws (customer supply).

**Technical data****Material**

Stainless steel floor plate and aluminium recess

Installation

Fix to floor using two countersunk screws $\varnothing 4.5$ mm (customer supply).

Recess required in floor

AUTOMATIC DOOR SEALS for metal and system doors

Barrier-free, sound insulation, smoke control, fire protection, tight seal and draught-free

Made-to-measure system doors call for customised sealing solutions. Doors for use in systems are typically installed in public buildings, factory halls and other industrial buildings.

- For acoustic, smoke and fire protection doors, tested by renowned test institutes
- Barrier-free
- Sound reduction of up to 54 dB
- Travel: up to 16 mm
- For single actuation
- Smoke control as per DIN18095 / EN1634

The new Stadi

Modular design with a system

The new version of Athmer's Stadi sealing range for system doors made of plastic, steel or aluminium is so versatile and adaptable that it covers a wide range of applications.

All Stadi versions are based on the same mechanical philosophy and this brings many advantages with it – such as parallel lowering, dispensing with an inner rail offset or the option of time-delayed closing.

In addition, the new Stadi series has been extended to include seals in sizes 17/17 and 17/20.

Certificate:
"DIN approved -
Barrier-free"

R. NO. P1 18/50/07

Fire doors

Acoustic doors

Closes with a tight seal

Damp room doors

Barrier-free access

Smoke doors

Optional time lag actuation

An optional time lag mechanism is available for all Stadi seals to delay closing.

A damping cylinder in combination with a spring ensures that the seal closing time is extended to about 6 to 8 seconds allowing the air to be displaced during this time and making the door suitable for airlock situations.

When the door is opened, the seal immediately lifts back up, thereby dispensing with any drag.

Stadi M-17/17 WS

Stadi L-20/20 WS

Stadi L-20/20 OS

Stadi L-24/20 WS

Athmer Rainstop® L-24/20 WS

Stadi - M / Stadi -L

- Significantly improved sound insulation of up to 54 dB
- Additional smaller dimensions (to 17/17)
- Easy maintenance, easy removal of the inner rail for changing the sealing profile
- No tools needed for adjustment
- Sliding actuator
- Hinge-side actuation
- **Optional** set-up for (standard) flush bolt
- **Optional** set-up for flush bolt
- Parallel actuation, automatic level compensation, overload protection
- No inner rail offset, resulting in improved corner seal
- Barrier-free access, lower actuation forces
- Easy screw-on angled installation
- Seal travel: up to 16 mm
- Suitable for DIN L/R
- Sealing profile made of self-extinguishing silicone for acoustic, smoke and fire protection (optionally silicone-free)
- Wide sealing profile for flexible floor level adjustment
- Automatic door seals bear the Ü-sign of compliance
- Stainless steel springs and rustproof inner mechanical parts

**Automatic
level compensation**

- Improved operational reliability since the system self-adjusts if conditions change

**Actuation****Hinge-side or lock-side actuation, as required**

- Actuator catch on hinge side

Seals even double-wing doors without leaving any gaps

For Ø 10 mm flush bolt

Flush bolt set-up

- Seal can be shortened on actuation side!
(Standard lengths from 900 mm by 125 mm)
- Available for all backsets. State dimension X on the order
- Standard floor recess can be used

Compatible with Stadi L

Stainless steel flush bolt

- Seals and flush bolt compatible with each other
- Bolt with continuously adjustable height with built-in seal
- Different versions for top and bottom
- Optional: Door seal prepared for flush bolt
- Seal can be cut to length! Can be kept in stock

Note: Minimum length if flush bolt hole incorporated = distance from drilled hole (X) + 270 mm

Stainless steel floor strike recess

For Ø 10 mm flush bolt

BS-10

- Continuously adjustable range ± 2 mm in opening and closing direction
- Retainer with elongated slot for easy positioning and tolerance compensation
- Optimal for automatic locks:
Long mounting surface and wide chamfer
- Stainless steel floor plate and retainer
- Zinc die-cast housing

Stadi L-24/15 BN

- Groove for fittings
- Automatic height and level compensation
- Parallel lowering from 580 mm

Athmer Rainstop®

Barrier-free external door seals

For Athmer, the optimum operating comfort of doors has traditionally been at the top of the agenda in product development. Today, we are experiencing that the requirements for barrier-free planning, construction and living are becoming increasingly important. However, despite the zero threshold and barrier-free access, especially on outside doors, neither wind, driving rain or noise are allowed to penetrate the interior.

With the new Athmer Rainstop® external door seal, Athmer is bringing a door seal onto the market that has been proven to meet all of the above-mentioned requirements.

For timber doors, the sealing system is available as a set with a suitable corner solution. The corner connection consists of a special water-repellent EPDM foam and can be cut to various rebate depths and geometries without any problems and in the shortest possible time. The self-adhesive foam parts can be stuck into the door frames without any unnecessary drying times.

A frame gap of three to six millimetres is thus effectively covered without any further adjustment of the seal and the door is protected against driving rain on all sides.

Athmer Rainstop® is threshold-free and therefore scores points not only visually, but also offers maximum accessibility.

Zero means zero

Athmer Rainstop® stands for certified quality: the renowned ift Rosenheim certifies the new sealing system's resistance to driving rain, resistance to wind load and excellent sound reduction values up to 51dB. Furthermore, Athmer Rainstop has successfully passed salt spray testing by the MPA NRW.

Athmer Rainstop® is based on the technology of the well-known and proven STADI-L series for system doors and therefore bears the Ü-sign of compliance. The sealing system is certified as barrier-free according to DIN 18040.

System door manufacturers can adapt Athmer Rainstop® individually, according to the geometry of their aluminium, plastic or steel door in corner areas - each profile door manufacturer requires their own solution, depending on the position of the seal and the hinge geometry.

We bring competence and experience to the table in cooperation and, together with the manufacturers, develop solutions that provide the highest tightness against wind, driving rain and noise - with minimal cost and effort.

In individual cases, additional measures such as rain guards, sanding brushes and drainage options in the threshold area can be taken into account and checked.

R. NO. P1B050/07

Athmer Rainstop® L-24/20 WS

Fast and reliable installation

- Sound reduction up to 51 dB
- Suitable for DIN L/R
- For doors opening outwards and inwards
- Automatic height adjustment
- Set-up for Ø10mm flush bolt optional
- Optional set-up for flush bolt
- No tools needed for adjustment

AUTOMATIC DOOR SEALS

For glass doors

Barrier-free, sound insulation, smoke control, fire protection, tight seal and draught-free

Athmer sealing systems for glass doors are versatile in use and are suitable for all glass types and thicknesses.

- Acoustic, smoke and fire doors
- Solutions for sliding doors
- Barrier-free access
- For numerous glass thicknesses
- Also for retrofitting

Product family**Schall-Ex® GS**

- For all-glass doors
- Suitable for DIN-L and DIN-R doors
- For acoustic, smoke and fire protection
- Models available for retrofitting
- Available in fixed and standard lengths
- Anodised surfaces optional to Euras or colour coated as per RAL

**Smoke and fire doors****Acoustic doors****Barrier-free****“Ü” sign of compliance****Optional:
Stopper plinth**

- Sealing profile made of self-extinguishing silicone
- Superior seal in combination with Athmer thresholds
- Meets requirements for barrier-free construction
- All automatic door seals for glass doors are supplied with the “Ü” sign of compliance

Sound insulation test report for Schall-Ex GS-8 available on request

Certificate: "DIN approved - Barrier-free"

- To optimise actuation in special frames.
Art. no. 5110 anodised silver-coloured
Art. no. 5118 anodised stainless steel-coloured (consisting of one pair with fixing screws)

Schall-Ex® GS-A

- For all doors from 6 mm glass thickness
- Seal and cover profile self-adhesive
- Reduced storage costs
- Suitable for retrofitting

Surface finish

- Silver-coloured, anodised C-0
- Stainless steel-coloured, anodised C-31

- Suitable for DIN-L and DIN-R doors
- Self-clamping aluminium adapter profile for glass
- Subsequent reduction in door height of 3 mm possible.

- End view: Timber frame with groove

Door leaf can be shortened on site by 3 mm.

- Cross section: Glass element

Glass at the bottom about 40 mm shorter than the door panel

Surface finish

Schall-Ex® Slide GS-A

- For doors from 6 mm glass thickness
 - Seal and separate cover profile, self-adhesive
 - Reduced storage costs
 - Suitable for retrofitting
-
- Silver-coloured, anodised C-0
 - Stainless steel-coloured, anodised C-31

“RUNDUMDICHT” sealing systems

Barrier-free, sound insulation, smoke protection, fire protection, tight seal

Sliding doors continue to be a strong trend in both the residential and commercial sectors, but market requirements have increased significantly in recent years.

With Athmer's “Rundumdicht” sealing solutions, timber, metal and glass sliding doors can be effectively sealed while also satisfying aesthetic requirements.

Pivot doors can now also be effectively sealed against sound, smoke and draughts.

- Effective seal against sound, smoke, draughts and odours
- Four-sided sealing system without compromising on appearance
- For timber, glass and metal doors

“Rundumdicht” Pivot L-15

Complete sealing system for pivot doors

- For single-wing timber pivot doors
- Effective seal against sound, smoke, draughts and odours
- Four-sided sealing system without compromising on appearance
- Sealing at top and bottom with automatic drop seal
- Special roller actuator with a counter roller allows the door to be opened in both directions
- Magnetic sealing system seals the gap between the frame or wall and the door
- Can be combined with many common fittings for pivot doors
- Very low opening forces and smooth swing action thanks to ideally matched magnetic sealing profiles
- Set for pivot door wing up to 2,000 x 3,000 mm max.
- Drop seals are positioned off-centre
- Door thickness must be selected to match thickness of pivot fitting and drop seal

“Rundumdicht” Universal M-12

Complete sealing system for sliding doors

➤ For single-wing sliding doors running in front of the wall

➤ For sliding doors made of timber, metal and glass

➤ Effective seal against sound, smoke, draughts and odours

➤ Four-sided sealing system without compromising on appearance

➤ Sealed at top and bottom with automatic drop seal

➤ Magnetic sealing system closes the gap between the door and the wall

➤ This prevents the door from rattling when exposed to draughts

➤ Self-locking system without additional latching or locking

➤ No need for frame, back rabbet or inlet pocket

➤ Door thickness irrelevant due to installation on the surface of the door leaf

➤ Can be combined with many common sliding door fittings

➤ Very low opening forces thanks to ideally matched magnetic sealing profiles

➤ Set for sliding door wing up to 1,500 x 3,000 mm max.

➤ Low planning and installation effort

➤ Internal durability test according to DIN EN 1527, class 6

(> 200,000 cycles)

AUTOMATIC DOOR SEALS for retrofitting

Barrier-free, sound insulation, smoke control, fire protection, tight seal and draught-free

A large number of Athmer door seals can be retrofitted - with little effort and during operation. Retrofittable seals are suitable for many different types of door: steel, aluminium, PVC, timber or glass doors; hinged or sliding doors; single-wing or double-wing doors.

Retrofitted seals optimise fire and smoke protection, improve acoustic and draught tightness and solve problems posed by warped doors or uneven floors. Retrofitting sealing systems helps to save heating costs, enhances living comfort and well-being and improves the energy balance of the building.

- For smoke, fire and acoustic protection doors
- Smoke protection as per DIN18095/EN1634 for retrofitting
- Travel: up to 50mm

Athmer - securely sealed.

NADI® Seals for retrofitting

- Smoke, fire and acoustic doors / dampers
- Damp and wet room doors
- Single- and double-wing hinged doors/dampers
- Thin and thick rebate doors, flush-fit doors/dampers
- Suitable for doors made of timber, metal, plastic, and glass
- Innovative sealing system for subsequent upgrading for smoke protection.*
- Noise-reduced door closing with damping function
- Quick, secure and inexpensive installation thanks to pre-formed corners
- Maintenance-free system
- Can be installed without removing the door
- No additional sealing measures required
- Elegant, snap-on cover profile without any visible screws. Surface silver-coloured, anodised (C-0)

Fire doors

Acoustic doors

Closes with a tight seal

Damp room doors

Barrier-free access

Smoke protection

*We confirm the suitability of the NADI® frame sealing system and the automatic Schall-Ex® L-15 FS door seal for the upgrading of a fire protection door based on DIN 18095-2 and DIN EN 1634-3. For potential necessary regulatory approval, we provide a report of the MPA NRW.

NADI® set profiles

- High sealing capacity even with strongly d-forming door leaf (Testing temperature 200°C for smoke protection test according to DIN 18095 / EN 1634 with 50 Pa)
- Max. 10 mm, optionally: 14 mm
- Thin and thick rebate doors, and flush-fit doors/dampers
- Snap-on cover profile
- Elongated holes and pre-formed corners for quick and easy installation
- For the door threshold
- Thin and thick rebate doors, and flush-fit doors/dampers
- Snap-on cover profile
- Elongated holes for quick and easy installation

For fire dampers, height 800 mm x width 600 mm =

1 set = 2 off

Height: 1 Set of NADI® LM K 320 323
(2 pieces, each 950 mm, can be shortened to 651 mm)

Width: 1 Set of NADI® LM K 320 321
(2 pieces, each 650 mm, can be shortened to 450 mm)

WE-Dicht

Retrofit sealing system for tight-closing apartment entrance doors

Extra comfort regarding sound insulation and energy saving by retrofitting WE-Dicht on existing apartment entrance doors.

State building regulations require tightly closing apartment entrance elements. These elements are often insufficiently available in existing housing stock and this can give rise to complaints from tenants.

By fitting WE-Dicht, optimal sound insulation is achieved on existing doors.

- Reduces draughts
- Optimises thermal insulation
- Improves the closing quality
- Tamper-proof
- Fast assembly
- 1 Set fits 6 interior door DIN sizes

WE-Dicht creates consistently satisfied tenants.

Technical data

Width / height, actuated	10.3 mm	29 mm
Profile length, vertical	2,100 mm (2 pieces)	
Profile length, horizontal	950 mm (1 piece)	
Can be shortened by	150 mm each on both sides	
Tolerance compensation	10 mm (optionally 14 mm)	
Profile material	Aluminium, natural, visible profiles Silver-coloured, anodised C-0	
Sealing profile material	Silicone, self-extinguishing	
Sealing profile colour	Grey	

This system convinces professionals with its fast assembly time.

Doors fitted with WE-Dicht are tightly sealed sustainably!

Schall-Ex® Applic

- For retrofitting smoke protection
- For retrofitting acoustic protection
- Flexible fit to uneven floors

Smoke and fire doors

- Use of self-extinguishing silicone profile

Schall-Ex® Applic is suitable for use with fire doors and smoke control doors. We recommend the following procedure: The door manufacturer (type plate on the door) should approve the door seal. The door manufacturer will be supported by us in doing so. Retrofitting is only possible with the permission of the building supervisory authority/fire authority.

Acoustic doors

- Direct sealing profile system on the door leaf
- Wide silicone profile for flexible floor level adjustment
- Sealing profile extends right into the corners
- For carpeted or tiled floors, use Athmer thresholds

Barrier-free

- Meets requirements for barrier-free construction

"Ü" sign of compliance

- Supplied with the "Ü" sign of compliance

Fixing

- Screw-fixed to the closing face
- Hinge-side actuation

Schall-Ex® Applic A

Schall-Ex® Applic T

FRAME SEALS

Barrier-free, sound insulation, smoke protection, fire protection, and draught-free

Seals for insulating sound have become an essential component in the design of new buildings and the upgrading of old buildings. As noise becomes an increasing problem, sound insulation measures are increasingly part of building codes. A door needs to be sealed on all four sides, since noise is transmitted through the air and therefore penetrates through every gap.

Athmer frame seals cover all gaps through which noise, smoke, light and dust can pass.

- ┐ Easy to shorten
- ┐ Self-adhesive
- ┐ Sound reduction up to 52 dB

Effective prevention against fingers becoming trapped between the door leaf and the frame

Athmer finger protection systems have been preventing injuries for thirty years by effectively reducing the risk of fingers becoming accidentally trapped in doors.

Finger protection on doors

The use of finger protection systems lies in principle within the responsibility of the operator. The operator makes a decision on the products depending on the door users and the spatial conditions, then determining the position of installation. Especially for the following applications and areas, specific rules and regulations apply:

Finger protection in child daycare centres

The German Accident Prevention Regulation (Unfall-Verhütungs-Vorschrift, UVV, DGUV Vorschrift 82 Kindertageseinrichtungen §13 [3]) presents architects, planners and builders of daycare facilities with new challenges. It specifies among other things in § 13 (3): "Shearing points must be avoided on the hinge side of doors." Our Athmer Finger Protection products offer the ideal solution.

Finger protection for fire doors

Athmer finger protection systems are also suitable for use with fire doors and smoke control doors. The door manufacturer must authorise the finger protection and have it registered in the general building authority approval for the respective door (German: allgemeine bauaufsichtliche Zulassung, abZ). Athmer provides support to door manufacturers in doing so.

For retrofitting, deviance from this regulation is only possible with permission from the building supervisory authority/fire authority. In the absence of regulations, there is currently no possibility to obtain general approval for finger protection systems.

Use our product configurator on the Athmer website:

Further information can be found at:
www.athmer.com

Product family

Athmer Finger Protection

for the hinge side on the closing face

- Reliably covers the gap between the door leaf and the door frame
- Maintenance-free
- Easy to clean
- Supply package includes accessories
- Aluminium profiles
- Opening face protective profiles are suitable for complete finger protection at the closing edge
- Retrofittable
- Available in fixed and standard lengths
- Individual choice of colours

NEW - NR-32 UniSafe® sets new standards

With the NR-32 UniSafe®, Athmer has developed a new finger protection system which proves itself through unique design, more safety and many additional features.

SAFETY in use

- Enhanced protection due to improved door gap cover and blunted profile edges
With tamper-proof KLiCK system and sturdy housing

One DESIGN for all applications

- Integration in existing inner architectures and door designs for continuous design throughout the building, for indoor and outdoor use

KLiCK system for fast and secure installation/ deinstallation

- Time-saving installation with only a few fixing points
- Easy replacement of damaged finger protection systems

INSTALLATION IN COMMERCIAL PROJECTS in two stages

- Delivery and installation of the fixing rails and finger protection at time-shifted intervals prevents damage to the product during the construction phase

ADAPTATION to panic fittings can easily be provided on site

- The carrier profile is equipped as standard for this purpose and can be easily inserted and disengaged from existing hardware systems, e.g. push bar, touch bar, ram protection bar, etc.

RAM PROTECTION for demanding environments (e.g. hospitals, airports)

- Force-deflecting element as additional protection for the door and frame

MAINTENANCE and CLEANING through simple unlocking

- Problem-free hinge maintenance, seal adjustment possible

Image video

Installation video

NR-32 UniSafe®

- Easy to install and dismantle
- One design for all applications
- KLIICK system with concealed screws
- Protective roller blind automatically maintains constant tension
- Flexible choice of colours
- Fabric made of fire-retardant synthetic fibre, black as standard
- Optional: **NR-32 UniSafe® XL** with  320 mm extension length for:
 - Fabric, black
 - Fabric, w-proof variant
- Optional: **Ram protection** in the lengths 500 mm, 960 mm, 1,923 mm

Athmer Finger Protection on automatic doors

Tested in accordance with EN 16005

Power-operated doors must open and close safely in order to ensure safety in use. For this purpose, a risk assessment must be carried out by the manufacturer of the door system during planning. Possible crushing and shearing hazard points must be identified and eliminated. For this reason, EN 16005 stipulates that the hinge side must be safeguarded on principle up to a height of 2,000 mm.

Retrofitting of existing doors according to ASR A1.7

If during regular maintenance by the service technician it is determined that protective devices are missing or do not correspond to the current state of the art, this must be entered in the test logbook and communicated to the operator. In order to comply with the workplace regulation ASR A1.7, the operator must also retrofit any existing doors with critical safety standards. If this is not done, the operator bears the risk of an accident.

For outdoor use

- Standard length for automatic doors: 2,015 mm (NR-32: 2,000 mm)

NEW! NR-32 UniSafe®

Opening side protective profiles

Protective profiles are suitable for safeguarding the hinge side of opening faces. We recommend these in the form of sets in individual lengths.

- Suitable for outdoor use
- Can be shortened
- Flexible choice of colours

- Do not use rising butt hinges.
- Can be mounted on the frame or on the door leaf, as required.

Product family

Opening side protective profiles

for the hinge side of the opening face

- Opening face protective profiles safeguard the gap between the door leaf and the frame reliably on the opening face.
- Suitable for retrofitting
- Maintenance-free
- Aluminium profiles anodised or colour coated
- Suitable for outdoor use
- Fixed lengths available
- For all hinge diameters
- Available as a set for installation under, between and above the hinges

Sets

- Surface finish: Anodised aluminium or colour coated
- Also available as a set, comprising:
 - Profile 1: below the lower hinge
 - Profile 2: between the hinges
 - Profile 3 (optional): above the upper hinge
- No cutting required on site
- Easy to install

Sets for self cutting to size

- 2-part for safeguarding between and below the hinges
- 3-part for safeguarding between, above and below the hinges
- For doors from 2.11 m

BA-28

Protective system BA-28 for surface-mounted hinges on metal doors

- Variable adjustment options
- Standard colour: silver anodised C-0; individual colours available
- Concealed screw fixing

Technical data:

Suitable for pivotal points from 20-36 mm.
Length supplied: 1,900 mm, can be shortened

BA-22

Protective system BA-22 for surface-mounted hinges on plastic doors

- Variable adjustment options
- Standard colour: white RAL 9016; individual colours available
- Concealed screw fixing

Technical data:

Suitable for overlap dimensions of 13-28 mm and hinge diameters from 21-26 mm.

Length supplied: 1,900 mm, can be shortened

NR-32 UniSafe® GLAS & Protective Profile BSG1 / BSG2

System solution for glass doors

- Architectural continuous solution
 - Complete covering of hinges and counter plates
 - Hinge side cover and spacers flush with each other
- Suitable for timber or metal door frames, and glass side elements
- Quick and easy installation
 - No need for markings or other installation aids
 - Closing face spacer rail and opening face protective profile are pre-fitted with special adhesive tape
- BSG1 / BSG2 - Protective profile for hinge side
 - Profile with groove permits notching as required for all conventional all-glass door hinges
- NR-32 UniSafe® GLAS protection for closing face
 - Spacer rail with NR-32 UniSafe®
 - Groove for notching the profile as necessary for hinge counter plates
- Delivery package:
 - Finish in anodised silver C-0 or C-31, further colours on request.
 - Delivery length: 1,950 mm or made to measure
- Special solutions on request

Application

The new HS-25 for main closing edges

Door stop with active finger protection

- Prevention of trapping and shearing points
- Prevents accidental closing of doors
- Permanent protective function through automatic activation when door is opened
- Manual unlocking possible for both sides of the door
- Knob optionally replaceable with any knob that matches the door element
- Ideal for use in crèches and child daycare centres:
 - U3 zone
 - Heavy doors
 - high frequented doors
 - Doors with door closer (e.g. in toilets)

Technical data:

- For timber hinged doors
- Suitable for rebated or non-rebated doors
- For DIN right/left doors
- Screw-fixed to the closing face of the door panel
- Variable installation height - Recommend minimum height of 1.70 m
- Maximum door leaf thickness 90 mm
- Flexible choice of colours

SwingGUARD

- A for safeguarding and sealing double-swing doors, revolving doors and sliding doors with a track stop or soft-close system

7. Door opening restrictor for timber and glass doors

The new Porti® family

For timber and glass doors

- Prevents hazards and damage caused by doors swinging back
- Adaptive damping protects the door leaf and frame
- Uniquely space-saving, design-oriented
- Easy to install
- For retrofitting to metal door frames
- Tripping hazards and unevenness are prevented
- Ideal for areas with stringent hygienic requirements, and where appearance matters
- Ideal for use in hotels, offices and doctors' surgeries
- Excellent for floors with underfloor heating

No drilling necessary in the floor for door stops

PORTI® for timber doors

- Maximum door leaf weight up to 65 kg
- Particularly thin lever of only 2 mm
- Restrictor plate 15.8 x 12 mm
- Upper door frame gap 4 - 10 mm
- Endurance tested
on the basis of DIN EN 13126-5
Meets class 4
- Door opening angle max. 120°
- The choice of hinge should take
account of the load exerted by the door
opening restrictor

Application

Up to 30 kg door leaf weight

- Retrofittable to solid timber and metal door frames
- For door leaf widths of:

720 mm - 1,110 mm, art. no. 5312

610 mm - 719 mm, art. no. 5313

Up to 65 kg door leaf weight

- Retrofittable to metal door frames
- For door leaf widths of:

720 mm - 1,110 mm, art. no. 5371

610 mm - 719 mm, art. no. 5379

- Set-up possible on timber frames with a fixing element in the door frame (see next page)
- For door leaf widths of:

720 mm - 1,110 mm, art. no. 5489

610 mm - 719 mm, art. no. 5465

7. Door opening restrictor for glass doors

Technical data

PORTI® for glass doors

- Maximum door leaf weight up to 50 kg
- Silver-coloured, anodised
- Slide plate bonded to glass door leaf
- Upper door frame gap 4 - 10 mm
- Particularly thin lever of only 2 mm
- Restrictor plate 16.8 x 12.2 mm
- Endurance tested on the basis of DIN EN 13126-5 Meets class 4
- Door opening angle max. 120°
- The use of sandblasted glass doors is not recommended
- Suitable for doors made of 8 / 10 / 12 mm ESG and also for LSG made from ESG
- 10 mm ESG recommended with Office hinges and adjustable hinge retainer

Application

Up to 50 kg door leaf weight

- Retrofittable to metal door frames
- For door leaf widths of:
709 mm - 959 mm, art. no. 5318

- Set-up possible on timber frames with **fixing element**
- For door leaf widths of:
709 mm - 959 mm, art. no. 5487
